CAREER OBJECTIVE

Aspiring Game Developer and Full Stack Developer with a strong foundation in software development and a passion for building immersive gaming experiences. Eager to contribute technical and creative skills in a dynamic environment, especially in the gaming industry. Seeking a role that blends development, design, and innovation to create impactful applications and games.

PROJECTS

EXPLORLOCAL

Travel Management System

Developed a Travel Management System is a web-based application designed to streamline the process of planning, booking, and managing travel itineraries for individuals or businesses. The system offers a user-friendly interface for travelers and administrators to manage bookings, payments, and travel details efficiently.

Horror Maze Escape

A 3D horror survival game built using Unity and C#, featuring systems like inventory, shopping, autosave, checkpoints, and sanity management. It includes dynamic player health and terror mechanics, with save/load functionality handled via PlayerPrefs and scene indexing.
